The **Public Service Commission** and the **Office of Regulatory Staff** have repeatedly chosen to dismiss pleas by South Carolinians for clean, affordable energy. Instead, they have colluded with SC utility monopolies, **SCE&G** and **Santee Cooper**, to force us to pay up to **\$19 Billion** for 2 technologically obsolete nuclear plants currently under construction in Jenkinsville, SC.

If seen, demand their immediate resignation and suggest that they donate their publicly funded \$100,000.00+ annual salary to the ratepayers to offset this unjust financial boondoggle and immediately stop hemorrhaging our money into this bankrupt project!
